Blue Berry Jam

Chris navigating a five foot water fall on Blue Berry Jam in Havasu.

Tips & Tweaks

You can turn your heater on high if your rig is overheating to help dissipate some of the heat.

Always tell people where you are going and how long you will be gone before you head off road... because getting lost and dying sucks!

Air snorkels don't just let you go into deep water, it also allows cooler and cleaner air enter your rig, especially if you are following a caravan down a dirt road.

You can fix a pinhole leak in your radiator by pouring pepper or egg whites into the radiator after it has cooled off.

Higher octane gas allows your engine to run cooler.

Safety: Chet would like to give out tire safety tips this month. Keep in mind that we neglect the tires that transport our pride and joy off-road toy to and from our runs. Take time and follow these ten tips to keep our tires up and running: 1. Check tire pressures and adjust at least once a month. 2. Inspect tires regularly for abnormal wear or damage. 3. Rotate tires every 6,000 miles or according to owner's manual. 4. Maintain tires in proper balance. 5. When not using the trailer cover the tires. 6. Never overload a tire. 7. Avoid overheating tires. 8. Replace tires when required. 9. Install tires in matched pairs or complete sets. 10. Select the right tires for your vehicle and driving environment.

Publicity: Scott would like to remind you; that if you have clubs that you would like to invite to the Desert Splash please contact him with the information so he can be sure those clubs get a flyer and an invite. Club invites to Desert Splash will be going out this month.
